The Institute of National Planning (INP) was established in 1960 as a public institution with an independent legal nature. It is dedicated to scientific activities that enhance the approach and concept of scientific planning in Egypt. INP aims to promote and establish planning principles across all national institutions and to disseminate a culture of planning within Egyptian society

Vision

To be a pioneering and influential think tank at the national and regional levels, renowned globally for its excellence.

Mission

To provide competitive, evidence-based research, training, education, consultancy, and community services that strengthen societal capabilities, and enhance policymaking and decision-making efficiency in the fields of planning and development.

Values

Diversity... Innovation ...
Sustainability...

Scope of Work

Research activities and Scientific Events

Annual Events

- The Annual International Conference of INP.

Monthly Events

- Tuesday Seminar.
- Scientific Follow-ups.
- Experts' Meeting.
- Young Researchers' Seminar.

Seasonal Events

- Distinguished lectures series by prominent Egyptian and international academicians, experts and thinkers.
- INP Salon.

The visit of the Executive Director of the Women Development Organization (WDO)

The visit of the Director General of the Arab Planning Institute in Kuwait

A meeting with the Japanese Ambassador to Egypt

INP Salon

Tuesday Seminar

A Seminar on "Water Sector Adaptation
for Sustainability"

A Seminar presenting the Project Report entitled "Deepening Local
Industrialization in Egypt" at the Egyptian Society of Engineers

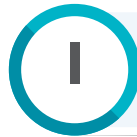

Professor Ashraf El- Arabi's Participation
To the Scientific Contributions of the National
Center for Social and Criminological Research

INP's Seminar at the Egyptian Senate

Postgraduate Studies

INP offers three accredited postgraduate degrees endorsed by the Supreme Council of Universities

Professional Master's Degree in Sustainable Development Planning

Program objectives

The Professional Master's Degree in Sustainable Development Planning aims at familiarizing students with the skills of developing, monitoring and evaluating plans while taking Sustainable development goals into consideration

Program Period: Two academic year

Admission Criteria

- A Bachelor of Arts/Bachelor of Science degree, or equivalent, from a recognized university or higher institute, or equivalent
- Passing the Interview
- A TOEFL score of (450)
- Employer's approval

2

Professional Master's in Monitoring and Evaluation

Program objectives

The Program primarily aims at developing students' skills and knowledge in the field of Monitoring and Evaluation, as well as enhancing their communication and teamwork skills, with a view to qualifying them to monitor and evaluate projects, programs, plans and policies

Program Period: Two Academic Years. The Program's Academic system is Credit Hour-based System (48 Credit Hours)

Admission Criteria

- A Bachelor of Arts/Bachelor of Science degree, or equivalent from a recognized university or higher institute with a minimum Cumulative Grade Rating of "Good"
- Passing the Interview
- A score of (500) in TOEFL or a score of 6 in IELTS
- Practical Experience (Preferable for admission)

3

Academic Master's in Planning and Development

Program objectives

The Academic Master of Planning and Development aims to prepare distinguished professionals in the field of planning and development. These individuals will be equipped to handle international and local developments within their respective organizations, whether governmental or non-governmental, with to the goal of enhancing their efficiency and effectiveness. This is achieved by offering an innovative educational and training environment that combines scientific knowledge with practical experiences, fostering innovation and a future-oriented vision to achieve excellence

Program Period: Two Academic Years. The Program's Academic system is Credit Hour-based System (36 Credit Hours)

Admission Criteria

- Holding a university degree in Economics from a recognized university or higher institute accredited by the Supreme Council of Universities with a minimum Cumulative Grade of “Good”. This also applies to B.A./B.Sc. degrees in majors other than Economics (such as Commerce, Law, Mass communication, Engineering, Science, Computers and Information, and Agriculture), or equivalent degrees from non-public universities and institutes recognized by the Supreme Council of Universities, with a minimum Cumulative Grade of “Good”
- Passing TOEFL and Mastering Computer
- Passing the Interview

OR

**Virtual online
training**

Other Training Programs are conducted

In the premises of the targeted agencies and institutions located in different regions and Governorates of Egypt.

Training on Financing Development of the Libyan government officials delegation in collaboration with iDEP

Training of INP personnel on digital transformation

1800+

Training Program

36000+

Trainees

Training Programs

1 Planning and Development Programs

As a pioneering think tank in the areas of planning and development in Egypt, INP offers a wide range of training programs focused on enabling individuals and institutions from different sectors to gain the knowledge and skills necessary for building a better future. These programs aim at strengthening participants' capacities in areas of strategic planning, project management, socio-economic development, data analysis and other relevant fields.

2 Sustainability Programs

As a leading planning and development institution in Egypt, INP recognizes the importance of sustainability in achieving inclusive and sustainable long-term development. INP, therefore, offers a wide range of specialized training programs on sustainability, with a view to enabling individuals and institutions across sectors to adopt sustainability practices in all areas of their work.

3 Local and decentralization development programs

In the context of modern State-building and achieving qualitative breakthrough in development, decentralization and governance are required. Egypt is working towards localization as provided for in the Constitution, while working towards establishing the optimal framework for the management of the State and community affairs, inclusion, complementarity and sharing of planning, management and financing competencies between the central Government and the governorates. Localization is a means not an end.

- To achieve the goals and guide decision-making, modern management, good governance, participation, democracy and transparency needed for sustainable development and a better life. It also aims at enabling local governments and communities to play an active role in the development process.

4 Economics and Finance Programs

This set of training programs highlights the critical role of finance within the community. It covers essential concepts and principles relevant to cash management and banking, capital markets operations, financial inclusion, payment methods in internal trade, and other key financial issues.

5

Management and Governance Programs

This set of programs focuses on the importance, objectives, and methods of implementing governance across all sectors to achieve public good and enhance transparency, accountability and justice in decision-making. Although organizations are composed of various divisions and departments, each with its respective competencies and objective, they work together towards the overarching goals of the organization. Governance plays a crucial role in coordinating these departments, ensuring they collaborate effectively, and bridging any gap between them.

6

Legal Programs

Given the importance of law in regulating public life, protecting rights, and enhancing justice, INP offers a wide range of specialized law-related training programs. These programs aim to equip individuals across different domains with the knowledge and skills needed to understand legislation and the practical applications of law.

7

Political Analysis Programs

Political analysis programs aim at understanding the government-citizen relationship and how law and political system impacts peoples' lives. Political analysis may be beneficial to any person willing to understand the powers that drive government and communities, whether for the purpose of applying this at work, family or public life levels.

8

Public Relations and Media Programs

The significance of Public Relations and Media Programs stems from their role in facilitating communication with external entities, such as journalists, media outlets, governments and other relevant stakeholders. By fostering effective communication, organizations can improve their societal standing and cultivate a favorable public perception. This involves writing press releases and disseminating them to newspapers and news agencies.

9

Digital Transformation Technology Programs

In recent times, digital transformation has become necessary for individuals and institutions alike. This transformation is a direct outcome of rapid technological advancements, exemplified by innovations such as AI, cloud computing, and the internet of things, which open new horizons for innovation and development across various sectors.

10

Scientific Research and Statistical Analysis Programs

Statistical analysis in scientific research constitutes a set of methods and methodologies used for data collection, analysis and interpretation through arithmetic and data processing techniques. It aims at describing a variable or a set of variables through the use of data obtained from the study sample. The goal of statistical analysis is to derive insights that aligns with the hypotheses and findings of the study, which enable researchers to produce comprehensive scientific research.

11

Human Resource Management and Total Quality Programs

Human resource management is one of the most important specializations in the labor market. This is due to HRM's focus on providing a conducive work environment, thereby enhancing productivity. Comprehensive quality management, as a catalyst for change, is impacted by the level, skills, beliefs and readiness for change within the Human Resources, while also playing a pivotal role in the development and upskilling of these personnel as one of the components of the change process.

12

Professional Diplomas

Diplomas serve as a bridge between theory and practice, providing individuals a golden opportunity to acquire specialized skills tailored to the demands of the labor market. The importance of diplomas is to enhance individuals' capacities and efficiency, qualifying them for excellence in their careers, and helping them succeed in various fields.

Diploma specializations span a wide range to comprehensively address INP's training domains, focusing on the applied aspect to meet the needs of various sectors.

Community Service

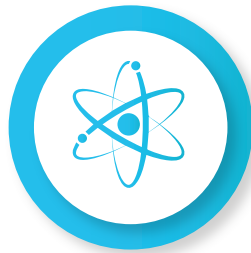

The institute offers various community service activities with a view to disseminating culture and awareness regarding planning and development issues among different categories of society

Cultural Activities

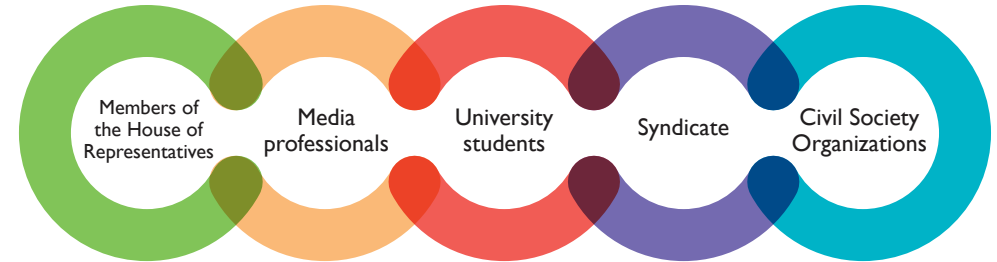

Social Activities

Scientific Activities

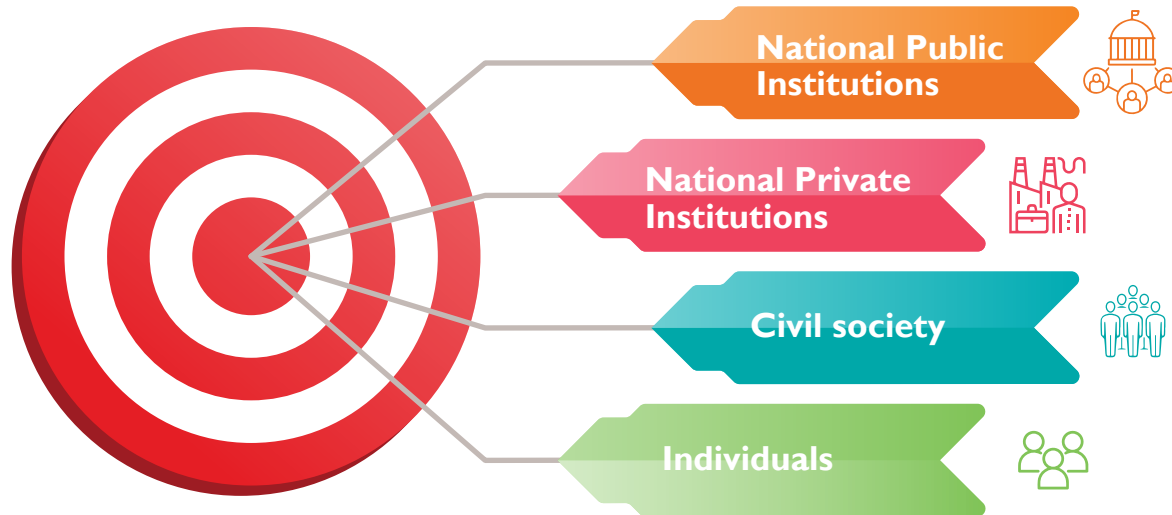

Many programs targeting different groups of society have been implemented

- Educational Workshops
- Voluntary training programs

- Industrial development policies
- Policies for the Development of Productive Service
- Management and Evaluation of Industrial and Service Projects
- Small and Medium-sized Enterprises

6

Regional Development

Scientific Departments

- Regional planning
- Labor force and population planning
- Geographic Information Systems
- Local and decentralized governance

7

Planning Techniques Center

Scientific Departments

- Model building
- Applied statistics and econometrics
- Information Systems and Technology and Decision Support
- Operations Research
- Future Studies

8

Social and Cultural Planning Center

Scientific Departments

- Social and Cultural Issues for Development and Planning
- Human Resource Development and Management
- Planning of Social and Cultural Services

Specialized Centers and Units

Center for Data Analysis and Consultancy (CDAC)

The Center for Data Analysis and Consultancy (CDAC) is a specialized center established in December 2022 to provide specialized economic, financial, administrative, and statistical consultancy services in the region. CDAC offers its outstanding services to the State and various public and private business sectors in Egypt and elsewhere, depending on reliable statistical and informational indicators. CDAC aims to serve the Egyptian, Arab, and African economies to support sound planning efforts aiming at achieving sustainable development goals (SDGs).

North Africa Applied Systems Analysis Center (NAASAC)

The North African Applied Systems Analysis Center (NAASAC) project is a result of collaboration between the Institute of National Planning, the Academy of Scientific Research and Technology and Maritime Transport, and the International Institute for Applied Systems Analysis (IIASA) in Austria. NAASAC was launched on the 20th of December 2021, with a view to building North Africa capacities in areas of systems thinking and systems analysis applications, creating and disseminating a culture of evidence-based decision-making within the region.

3

The Modelling Unit

A specialized unit established in 2020 to promote capacity building and skills development in the field of quantitative models, with a view to applying these quantitative models in the research outputs prepared by the members of the Unit. This is in addition to ensuring collaboration with Arab and international institutes for conducting joint training and research.

4

The Economic Governance Unit

The Economic Governance Unit was established at the Institute of National Planning in November 2023. The unit's objective is to prepare national cadres capable of building and applying simulation models using the System Dynamics methodology to study dynamic complex economic, social, and environmental problems within the framework of alternative future scenarios. This aims at supporting policymakers and planning officials at all levels of governance.

The unit is currently developing an integrated simulation model for the sustainable development goals of Egypt, employing a systems dynamics approach. This initiative is part of a partnership with the United States Agency for International Development (USAID) and the Millennium Institute.

5 Quality Assurance and Accreditation Unit

The Quality Assurance and Accreditation Unit aims to implement academic and training programs at outstanding quality rates. The Unit works with national and international institutions to prepare INP for various quality standard certifications.

Accreditation and Certificates obtained by the Institute of National Planning

INP obtained the accreditation of the National Authority for Quality Assurance and Accreditation of Education (NAQAEE) in 2022.

NAQAEE 2022

INP obtained several international quality standards certificates:

Quality Management System

ISO 9001:2015

Educational/Research Institutions Management System

ISO 21001:2018

Occupational Health and Safety Management System

ISO 45001:2018

Environmental Management System

ISO 14001:2015
